

GEOLINKCONNECT

geolinkconnect

CONTROL AND OPTIMIZE YOUR DATA TRANSMISSION

BE IN THE MIDDLE OF NOWHERE.
AND AT THE CENTER OF EVERYTHING.™

DESIGNED FOR PROFESSIONAL, GEOLINKCONNECT ALLOWS TO SAVE UP TO 70% ON YOUR DATA COMMUNICATION COST.

GEOLINKCONNECT: THE SOLUTION TO REDUCE YOUR COMMUNICATION COST!

GeolinkConnect is a messaging application using a data transmission protocol that compresses the data transferred and reduces transmission time. Designed for low connections, GeolinkConnect is a unique messaging tool optimised to easily transfer data in a cost-effective way. You manage your connection time more efficiently and control more easily the e-mail messages flow.

IMPROVE YOUR EFFICIENCY WITH SEAMOBILE EUROPE GLOBAL SOLUTIONS

Thanks to its strong partnership with the best satellite operators such as Inmarsat, Iridium and Thuraya, SeaMobile Europe equipments keep you connected all around the world. These satellite links combined with our easy-to-use tools and services guarantee the optimization and reliability of your communication. We put our customers at the center of everything, even in the middle of nowhere.

COMBINE GEOLINKCONNECT WITH OUR SATELLITE COMMUNICATIONS

- **Inmarsat FleetBroadband**

FleetBroadband gives you faster, more cost-effective access to broadband services, up to 432 kbps, offering seafarers an affordable voice and data option, while providing your vessel global coverage.

- **Iridium OpenPort**

Iridium OpenPort offers true IP connectivity with up to three phone lines available for simultaneous use with a guaranteed connection of 32, 64 or 128 kbps. Easy to install and surprisingly affordable, Iridium OpenPort delivers more bandwidth at sea receiving Iridium's worldwide pole-to-pole coverage.

- **Iridium 9555**

Smaller, sleek and easy to use, the new 9555 iridium phone resists to water, dust and shock. Thanks to its mini USB data port, Iridium 9555 can be used as a modem when connected to a computer, offering low connection all around the world.

- **Inmarsat BGAN**

Thanks to its worldwide coverage, the BGAN satellite terminal is the ideal solution to combine mobility and connectivity all over the world. Small, light and robust, this satellite solution offers a voice and data access simultaneously with a connection up to 492 kbps or 256 kbps streaming access.

- **Thuraya IP**

Compact and resistant, the Thuraya IP terminal is the vital work tool for mobile workers. Transferring data, browsing the Internet or making phone calls, has never been that easy even in the open desert. With a large coverage on more than 120 countries, Thuraya IP offers a connection up to 444 kbps and 384 kbps in guaranteed access.
